perpendicular lines. It is called a right angle.

I have placed it on the following things and found that angles made by them are less than the angle I have in the corner of the sheet.

I have placed it on the following things and found that angles made by them are more than the angle I have in the corner of the sheet.

**Activity 1**  
Make any four different angles using matchsticks and paste them here.

Example: acute, right, obtuse, reflex

**Activity 2**  
Use paper folding method to find different angles which can be made and paste them here.

right, obtuse, acute, full rotation

**For the Teacher**  
Students should be guided to make 'different angles' as less than a right angle or more than a right angle.

### Drawing of Angles Using Protractor

Marking you have to do the following steps to draw an angle using the protractor. Now please tell how to use it for drawing of angles.

Step 1: Look at the 0° mark. Suppose we want to draw an angle of 45°.

Step 2: Place the centre of the protractor on the vertex of the angle and bisecting the protractor along the arm of the angle.

Step 3: Locate 45° on the protractor along the inner edge such that it is along the inner base and put a dot there.

Step 4: Now remove the protractor and then join this dot with the vertex of the angle to make another arm.

Step 5: Mark 45° between the arms to complete the angle.

That's Karkey! It is very interesting!

**Let's Practice**

- Draw the following angles using the protractor: 30°, 45°, 60°, 75°, 90°, 120°, 210°, 330°
- Identify the error in drawing of the following angle using the protractor and write their correct measures.

**Naming an Angle**  
We can name an angle using three points with the vertex point in the middle as ∠APB or ∠BPA.

**Let's Practice**  
Observe the angles given below and write the names of each vertex, arm and angle (using three letters).

Angle	Vertex	Arms	Name of the angle
	G	GA, GB	∠AGB
	H	HA, HB	∠AHB
	E	EA, EB	∠AEB
	A	AN, AP	∠PAN
	T	TM, TS	∠MTS

Now join the letters formed using the vertices and write here.

AGC, XEZ, HIG, JKL, STM

**Activity 1**  
# Let's make a paper protractor.

Step 1: Take a square sheet of paper and fold it to make a right angle. Repeat this step to make a 45° angle.

Step 2: Now fold the paper to make a 90° angle. Repeat this step to make a 180° angle.

Step 3: Now cut the paper along the fold lines to make a paper protractor.

Step 4: Now draw the scale on the paper protractor.

### Angles

Write type of angles at the given time.

Q. 6:00 = Straight angle

Q. 5:15 = obtuse angle

Q. 7:00 = obtuse angle

**Measuring Angle Using a Protractor**

Write your name using line segments only for drawing letters as shown below and then mark acute, obtuse, right and straight angle in it.

Acute, Obtuse angle, Right angle, Straight angle

Acute, Straight, Obtuse, Right

Yes, this is a 2-degree instrument that we use to draw angles. It is called a protractor.

Yes, I know. Let's make an angle and measure it using the protractor.

It is used to find the exact measure of any angle.

Yes, I know how to use it. Please tell me.

## Feedback of Online classes

To all BBPS teachers, you all are doing perfect work for our children. As we all know that it is a hard time for the whole world and specially for children as they have a routine to go to school and meet their friends and loving teachers and because of lockdown they all are staying at home and not able to meet their friends but thanks to BBPS teachers to provide online live sessions. My child is always being excited for their live classes. All the teachers are doing their best. I'm fully satisfied and appreciate you from the bottom of my heart. Thanks to all the teachers for their loving and caring attitude towards our children.
